Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p>

Continuation of 3. NOTE: Proposed specification amendment is not compliant with 37 CFR 1.78(a)(6) requiring the surcharge set forth under 37 CFR 1.17(t) and a statement that entire delay was unintentional.

Continuation of 11. does NOT place the application in condition for allowance because: With respect to claim 1 and 2, Applicant argues that LaGrange et al. and Downing, either alone or in combination, fail to teach a slipper extending over an entire length of the rocker foot. However, the claims merely recite that the slipper must be able to stretch over the rocker foot, but does not require the slipper to fit over the entire rocker foot. Moreover, the size of rocker feet vary greatly depending on the type of chair being used. For example, a child's rocking chair has a rocker foot significantly smaller than an adult rocking chair. With respect to claims 3-6, Applicant argues that the cited references do not teach the recite strategic placement of strips, the recited lengths, or sewn fold fabric. However, the prior Office Action sets forth that these minor alterations to the teachings of LaGrange et al. in view of Downing each involve an obvious matter of design choice, and, therefore, are nonpatentable distinctions. With respect to claim 7, LaGrange et al. teaches a decorative trim at sleeve 32 (Fig. 2). With respect to claims 8 and 9, Downing teaches a ribbon on the front of the slipper capable of being tied into bow to secure the slipper around the rocker foot and capable of providing a decorative appearance. WIth respect to claim 10, the elastic strip 32 of LaGrange et al. being sewn to the fabric provides the rigid connection.
